

SAHAL SAMEER ALSHETHRI

BIM Coordinator | Infrastructure & Landscape

alshethrisahal@gmail.com

Riyadh, Saudi Arabia

sahalalshethri.com

PROFESSIONAL SUMMARY

BIM Coordinator and Design Engineer with 3+ years delivering multidisciplinary BIM coordination, COBie-driven asset information management, and infrastructure delivery across Saudi Arabia mega-projects. Specialised in ISO 19650-aligned workflows, CDE management (ACC / Aconex), federated model coordination (Revit, Navisworks), and structured data handover. Proven track record across 4.7M m² of coordinated project area spanning golf course, coastal, and desert-rehabilitation developments. Fluent in BIM execution planning, EIR/AIR compliance, and Dynamo automation for scalable, repeatable BIM processes.

KEY HIGHLIGHTS

- 4.7M m² of total project area coordinated across three Saudi infrastructure and landscape mega-projects.
- 70+ COBie and asset register packages prepared and delivered — full data integrity from design through client handover.
- 75+ multidisciplinary BIM models federated and coordinated across architectural, civil, MEP, and landscape disciplines.
- 30+ IFC exports and shop drawing packages delivered in support of construction and project delivery teams.
- Proficient in 10+ BIM and design platforms: Revit, Navisworks, Civil 3D, Dynamo, ACC/BIM 360, Aconex, Revizto, AutoCAD, 3Ds Max, Lumion.
- ISO 19650-aligned BIM workflows including EIR/AIR compliance, BEP input, LOD/LOI definition, and CDE-based model management.

PROFESSIONAL EXPERIENCE

Design Engineer

Oct 2023 – Present

Citiscapex · Riyadh, Saudi Arabia

- Owned end-to-end COBie and asset information workflows across 70+ infrastructure packages, maintaining full data integrity from design through to client handover in compliance with EIR and AIR requirements.
- Federated and coordinated 75+ multidisciplinary BIM models (architectural, civil, MEP, landscape) using Revit and Navisworks Manage, enabling systematic clash detection and resolution across disciplines.
- Delivered IFC documentation and shop drawings for irrigation networks, utility systems, and landscape infrastructure across three Saudi mega-developments totalling 4.7M m².
- Managed CDE workflows across Autodesk Construction Cloud (BIM 360) and Aconex, controlling model publication, review, and approval processes for multi-discipline project teams.
- Authored Dynamo automation scripts to eliminate repetitive BIM modelling tasks, enforcing model consistency standards and reducing manual data entry across project phases.
- Coordinated model integration and clash resolution across architectural, civil, and MEP disciplines, producing structured asset data packages aligned with COBie handover requirements.
- Supported BEP development and LOD/LOI definition for infrastructure packages, ensuring model deliverables met contractual information requirements at each project milestone.

Interior Designer

Jul 2023 – Sep 2023

U. Oasis Consultant Engineering · Khobar, Saudi Arabia

- Designed a full-service coffee shop in Hail from concept development through construction-ready documentation.
- Contributed to a high-end palace interior project in Al Hizam Al Thahabi, producing interior plans, finishes layouts, and 3D concept visuals for client presentations.

FEATURED PROJECTS

Diriyah Golf Course — BIM Coordination 780,000 m²

Managed COBie and asset information workflows for a 780,000 m² golf course development in Diriyah, coordinating irrigation, utilities, and landscape systems. Delivered federated model packages, clash coordination, and COBie-compliant asset registers for infrastructure handover.

Tools: Revit · Navisworks · Civil 3D · ACC · Dynamo · Aconex

Red Sea Coastal Village — BIM Coordination 1,500,000 m²

Coordinated BIM models for a 1.5M m² coastal village development along the Red Sea, managing multidisciplinary model federation and CDE workflows. Supported constructible infrastructure delivery across civil, MEP, and landscape packages.

Tools: Revit · Navisworks · Civil 3D · ACC · Aconex · Revizto

Wadi Greening — BIM Modelling & IFC Delivery 2,416,033 m²

Delivered Revit models and IFC documentation for a 2.4M m² desert rehabilitation and wadi greening initiative, coordinating landscape and civil design teams. Produced IFC exports and automated model tasks via Dynamo to maintain delivery velocity.

Tools: Revit · Navisworks · Civil 3D · Dynamo

Additional Contributions

- Ashfur & Turbah Desalination Towers — Shop drawing production for two water desalination plant towers (AutoCAD).
- Madinah Project — Shop drawing contributions as part of the project delivery team (AutoCAD).
- Roshn Nursery, Riyadh & Jeddah — Shop drawings and site supervision across two nursery construction projects (AutoCAD + Site).

TECHNICAL SKILLS

BIM Software: Autodesk Revit, Navisworks Manage, Civil 3D, Dynamo, AutoCAD

CDE & Collaboration: Autodesk Construction Cloud (ACC / BIM 360), Aconex, Revizto

BIM Standards & Data: COBie, IFC, ISO 19650, EIR / AIR, BEP, LOD / LOI, Asset Registers

Visualisation: 3Ds Max, V-Ray, Lumion

Coordination Disciplines: BIM Coordination, Clash Detection, Model Federation, Shop Drawings, Infrastructure Delivery

Professional Strengths: Cross-discipline coordination, QA/QC, technical documentation, process automation, on-time delivery

EDUCATION

Bachelor of Interior Architecture

Graduated Jun 2023

Imam Abdulrahman Bin Faisal University (IAU) · Dammam, Saudi Arabia

Studies covered design principles, 3D modelling, architectural visualisation, and construction documentation — providing the technical foundation for transition into BIM coordination and infrastructure delivery.
